

## The basics

Setting up your Tonie is really simple.

All you need is:

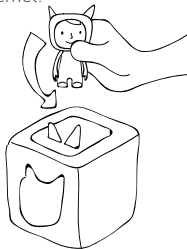

Go to [www.tonies.com/support](http://www.tonies.com/support) if you need help connecting your Toniebox to the internet.

## Quick guide

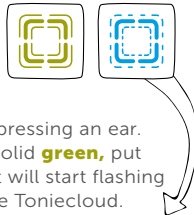

### Put your Tonie on top and listen

– the box does the rest!

It's really easy. Follow these two steps to play your new Tonie whenever you like ...

### 1. Put your Tonie on top

Switch on the Toniebox by pressing an ear. When the square lights up solid **green**, put your Tonie on top. The light will start flashing **blue** as your box links to the Toniecloud.

### 2. Wait a moment ...

Your audio is now downloading. It will start playing as soon as it's connected, and you'll hear a **confirmation sound** when the download has finished. The light will change back to solid **green**.

### Done!

**You can now listen anytime, anywhere!**

Your new audio is stored on your Toniebox so you can play it anywhere – even without an internet connection. Enjoy!

[www.tonies.com/support](http://www.tonies.com/support)

**Important:** You need to keep the Toniebox within close range of your WLAN signal while the LED is flashing blue. This is when the audio file is being downloaded. The better the connection, the quicker you can get going!
