

The basics

Setting up your Creative-Tonie is really simple. All you need is:

Creative-Tonie

1

Internet access

2

3

Toniebox with a wireless internet connection

Toniecloud account
this is essential!

4

Please note: You need a free Toniecloud account to use your Creative-Tonie. Sign up now at my.tonies.com. It's really easy and only takes a few minutes.

If your Toniebox is brand new and hasn't been connected to the internet yet, then follow these instructions first at my.tonies.com/setup

Tip: You need to keep the Toniebox within close range of your WLAN signal during setup. The better the connection, the quicker you can get going!

Troubleshooting

When an error occurs, the Toniebox will let you know with a voice message and a flashing red LED light, for example:

1. ... if the internet connection is interrupted. Most of the time it helps to simply lift the Creative-Tonie off the box and place it back on.

2. ... if the Creative-Tonie has been restricted to playing content only on a specific Toniebox.

3. ... if the Toniebox can't connect with a new Creative-Tonie. To do this, it must be linked to a customer account in the Toniecloud. This is also necessary to upload content onto the Creative-Tonie. Create your Toniecloud account here: my.tonies.com

For trickier errors, the Toniebox will give you a code word. To find out what it means and get instructions on what to do next, visit:

Quick guide

Just three steps ...

... and your own audio adventure begins!

1. Put your Creative-Tonie on top

Switch on the Toniebox by pressing an ear. When the square lights up solid green, stand your new Creative-Tonie on the Toniebox and wait until you hear a voice message. That means you're connected to the Tonicloud and ready to go!

Important: You need to keep the Toniebox within close range of your WLAN signal while the LED is flashing blue.

2. Take the Creative-Tonie off and upload audio

There are two options. You can upload audio via your Tonicloud account at my.tonies.com.

Log in and find your new Creative-Tonie in 'Creative-Tonies', then choose content like MP3 files and your own recordings to send to your character ...

... or download the Tonie-App.

This acts like a voice recorder so you can narrate your own adventures, tell your favourite stories or send messages. The app uploads audio automatically to your Creative-Tonie.

Download the free Tonie-App

Tonie-App available for iOS from version 9 and Android from version 4.4 (KitKat).

3. Sync and put Creative-Tonie back on top

Squeeze one of the Toniebox ears for three seconds. Let go when you hear a sound, and then put the Creative-Tonie back on as soon as the light turns solid green again. The new content will be played and downloaded simultaneously.

Done!

When the light turns green, everything has been downloaded and you're ready to listen!

Add new to the top

If you switch the Live option on, the Creative-Tonie will play the most recently uploaded audio first. It's like sending a new message that will play before everything else!
