

Warnings and safety instructions

Please keep this quick reference guide in a safe place as it contains important information about the product and its use.

Safety instructions for using the charging station

The Toniebox should only be operated with the corresponding charger (included in the starter set), which is a special transformer for toys. This charger consists of the AC adapter and the charging station. Misuse of the charger may result in an electric shock. The charger must be checked regularly for damage to the cable, plug, casing and other components. In the event of damage, the charger may only be used again after it has been professionally repaired. The charger must not be cleaned with liquids. The Toniebox must be disconnected from the charger before cleaning. The charger is not a toy and should therefore only be used by adults. When connecting it to the outlet, please ensure that the outlet is close enough and easy to reach. The charging station is a passive component and is only to be used in combination with the Toniebox.

Safety instructions

Please note that the Toniebox is an audio device with complicated technology inside. It works best within a temperature range of +5 and +35 degrees Celsius. The Toniebox is designed for use at home and is not splash- or drip-proof. The batteries in the device, which allow the mobile use of the Toniebox, are not removable. Replacement of the batteries by the user is therefore not permitted. Opening the box by the user or unauthorized persons will void the warranty. Please only use our original „Tonie-Lauscher“ headphones to ensure that the permissible volume for children's ears is maintained.

Attention! All Tonies contain inaccessible, strong magnets. Please keep them away from medical components such as defibrillators, shunts or pacemakers as well as from magnetic sensitive products such as magnetic data carriers, credit cards or computers.

Technical data for WLAN

The transmission power is 20 dBm, the frequency band is 2400 MHz - 2483.5 MHz.

The Toniebox must be set up by an adult.

Care instructions

The Toniebox is robust and sturdy, and designed to withstand children's play. Please keep these instructions in mind to prolong the life of your Toniebox. The Toniebox must be disconnected from the adapter before cleaning. Clean the material and top side of the Toniebox regularly with a damp microfibre cloth. Please do not use solvents, chlorides or chemical cleaning agents. Little footprints left by the Tonies on the top of the box can be removed with a plain-coloured rubber. Then you can clean the area with a damp microfibre cloth. Do not leave the Toniebox near a heat source for long periods of time.

EC Declaration of Conformity

Boxine GmbH hereby declares that the starter set complies with the essential requirements and the relevant provisions of Directive 2014/53/EU. The declaration of conformity can be found at:
